

The logo for Alumil, featuring the word "alumil" in a bold, lowercase, sans-serif font. The letter "a" has a diagonal stroke, and the "l" has a vertical stroke. The logo is set against a yellow diamond-shaped background, which is part of a larger graphic design.The Alumil logo, identical to the one at the top of the page, followed by the text "SUPREME S700" in a smaller, lowercase, sans-serif font.

**alumil** SUPREME  
S700

# Cuprins

## Noua legatura dintre arhitectura transparenta si eficienta energetica

Sistemul SUPREME S700 reprezinta noua generatie de sisteme liftant-glisante ALUMIL, pentru deschideri largi si profile cu caracteristici impresionante. Sistemul este aliniat noilor trenduri de arhitectura "transparenta", combinand un grad ridicat de izolare termica, siguranta si design-ul modern.

## Conceptul de proiectare si caracteristici

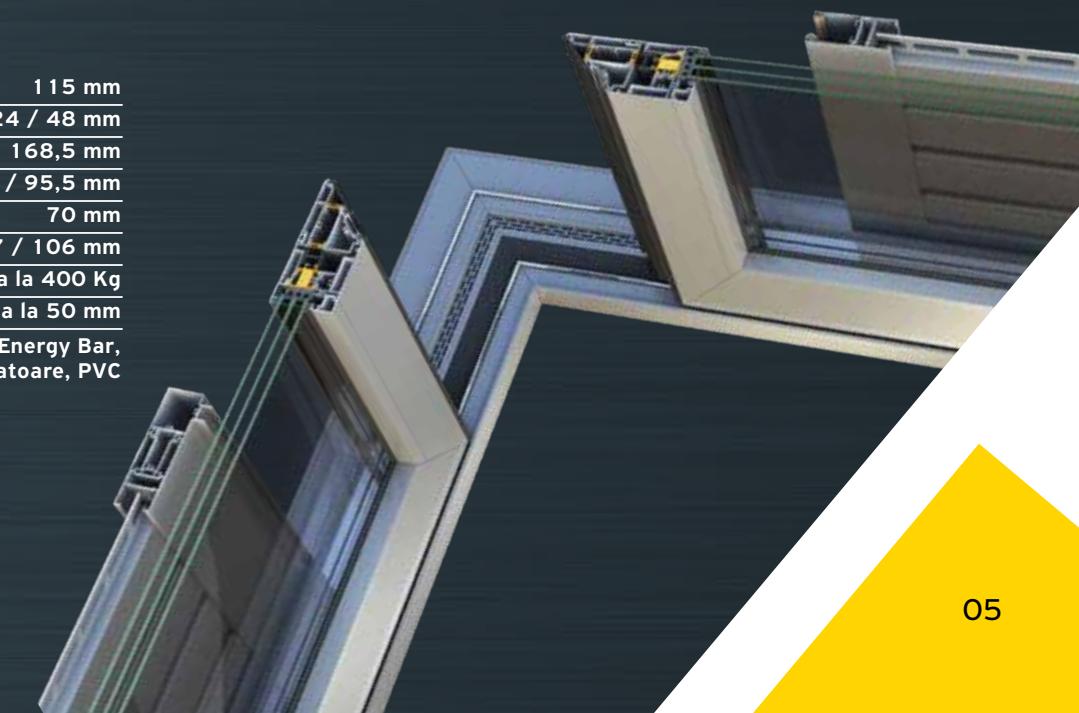

Sistemul liftant-glisant de top, SUPREME S700, satisface chiar si cele mai solicitante cerinte, oferind:

- / Eficiență energetică ridicată.
- / Etanșeitate la apă și eficiență permeabilitate a aerului.
- / Funcționalitate de top, chiar și pentru construcții de dimensiuni mari.
- / Design minimalist și inovator.
- / Solutii inovatoare pentru constructii impresionante.

### Caracteristici tehnice

Latimea vizibilă a aluminiului	<b>115 mm</b>
Inalțimea tocui	<b>24 / 48 mm</b>
Latimea tocui	<b>168,5 mm</b>
Inalțimea cercevelei	<b>84 / 95,5 mm</b>
Latimea cercevelei	<b>70 mm</b>
Latimea punctului de blocare	<b>47 / 106 mm</b>
Greutatea cercevelei	<b>de pana la 400 Kg</b>
Grosimea geamului	<b>de pana la 50 mm</b>
Izolare	<b>Poliamide, ALUMIL Energy Bar, Spuma izolatoare, PVC</b>

Sentimentul libertatii absolute

SUPREME S700 este combinatia perfecta dintre eleganta si functionalitate, satisfacand cele mai pretentioase cerinte. SUPREME S700 ofera vizibilitate maxima si simtul libertatii, folosind o cercevea de doar 84 mm inaltime. Alternativ, pentru constructii mai ample, se poate utiliza o cercevea de 95,5 mm.

Pragul de dimensiuni reduse si cu bariera termica permite accesul facil si sigur al copiilor, seniorilor si persoanelor cu nevoi speciale. Este disponibil pentru fiecare tipologie a sistemului, cu performante ridicate si sistem inovator de drenare a apei.

Aspect elegant ce minimizeaza suprafata de aluminiu vibizila, prin folosirea profilului de blocare ingust, cu suprafata de doar 47mm!

Mai mult decat atat, manerul ingust integrat la profilul de blocare, dincolo de aspectul si functionalitatea sa, ofera si robustete structurii si o rezistenta sporita contra incarcarilor generate de vant.

In aditie, multumita profilelor ranforse ale sistemului, ramele cu inaltime de pana la 3 m inaltime pot fi produse, pastrand un nivel ridicat de functionalitate si performanta.

# Atentie la detalii

Design-ul inovator si patentat al sistemului avansat de drenare a apei ofera performante excelente, chiar si in cazul unor conditii climatice severe.

**1** Sistem inteligent de drenare a apei, chiar si in cazul unor conditii climatice severe.

**2** Accesoriu special patentat pentru drenarea apei, plasat sub punctul central de blocare, oferind un nivel ridicat de etanseitate la apa.

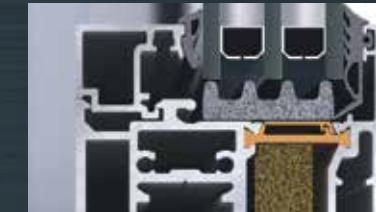

**3** Pragul de dimensiuni reduse este facut din 3 profile cu nivelurile necesare, ce faciliteaza eliminarea apei acumulate spre exteriorul constructiei.

**4** Profile speciale perforate, asamblate impreuna, permit apei sa tranziteze profilul pana la eliminare.

SUPREME S700 foloseste poliamida anti-distorsione speciala, ce minimizeaza problemele operationale si posibilele defectiuni ale profilelor datorate fluctuațiilor de temperatură.

In plus, izolatorii din spuma PE dispusi perimetral impreuna cu rasinile fenolice imbunatatesc izolarea termica a sistemului, permitand simultan o ventilatie adevarata a pachetului de sticla.

Profilele din PVC reduc adancimea vizibila a toculei, subliniind design-ul elegant al sistemului, contribuind si la izolarea termica si impermeabilitatea apei. Ofera, de asemenea, protectie contra razelor UV, menintand durabilitatea si textura lor in fata expunerii radiatiilor solare.

Design special al suportului de aluminiu ce transfera incarcarile direct catre rulouri, maximizand performanta si glisarea lina a cercevelelor.

Cerceaua usii gliseaza incet si silentios pe calea de rulare solidă, produsa din otel inoxidabil AISI 316L, cu duritatea suprafetei 130 HB si ridigibilitate de doar 0,05 mm.

Chiar atunci cand se opteaza pentru o cale de rulare clasica, exista o componenta speciala, patentata pentru drenarea apei, ce permite fluxului de apa sa fie condus spre exterior, oferind astfel o etanseitate la apa foarte buna.

# Satisfacerea specificatiilor si necesitatilor contemporane

Ideal pentru tipologii constructive de pana la 400 de kg per canat, in combinatie cu mecanismul liftant-glisante, sistemul ofera:

- / Operare lina si silentioasa a canaturilor glisante.
- / Protectie anti-efractie ridicata datorita componentelor hardware robuste.
- / Operare usoara chiar si in cazul celor mai mari si grele canaturi.

## Manere

Sistemul este echipat cu manere pentru sistemele liftant-glisante, proiectate de ALUMIL si fabricate de specialisti de talie mondiala, pentru a asigura calitate de top si manevrare fara cusur.

- / Serii standard produse din aluminiu si disponibile in culori standard.
- / Seria Supreme, produse din alama cu finisaje in culori mate.

## Versiune automatizata

Eleganta si confortul sunt combinate in versiunea automatizata a sistemului SUPREME S700, multumita unei telecomenzi ce asigura siguranta si functionalitate.

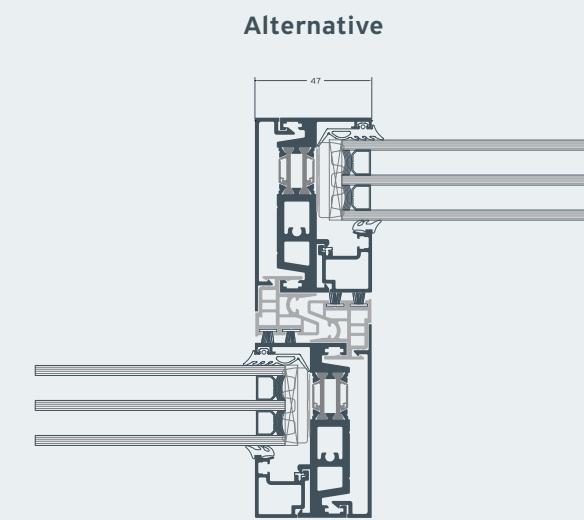

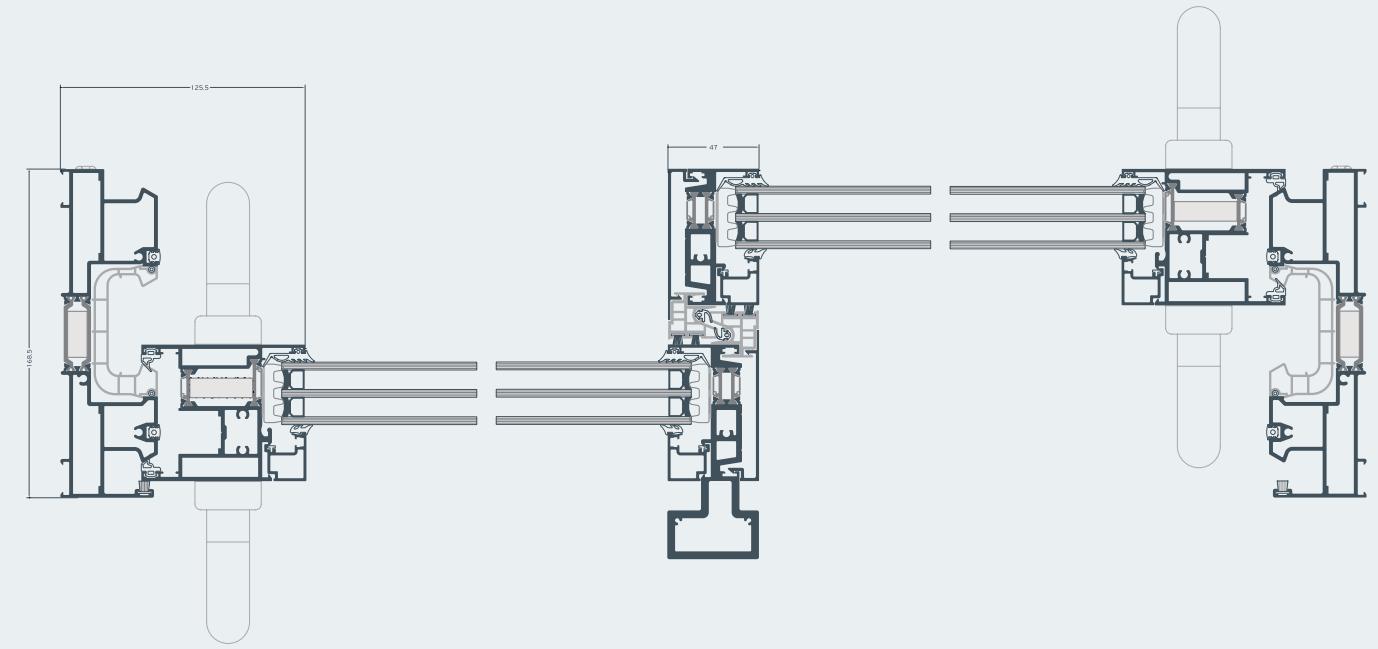

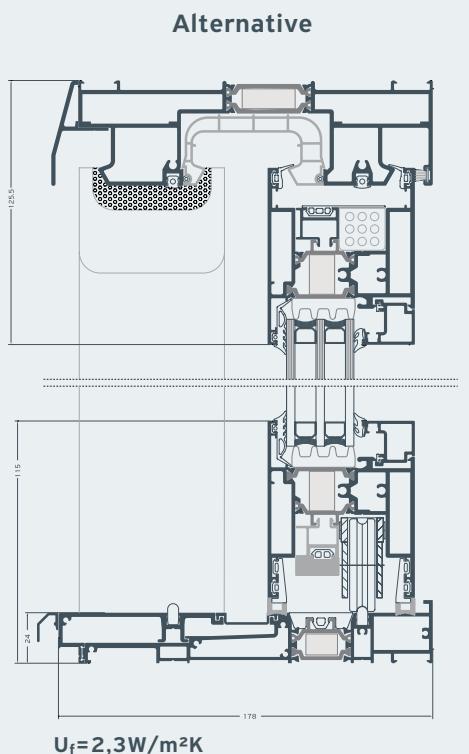

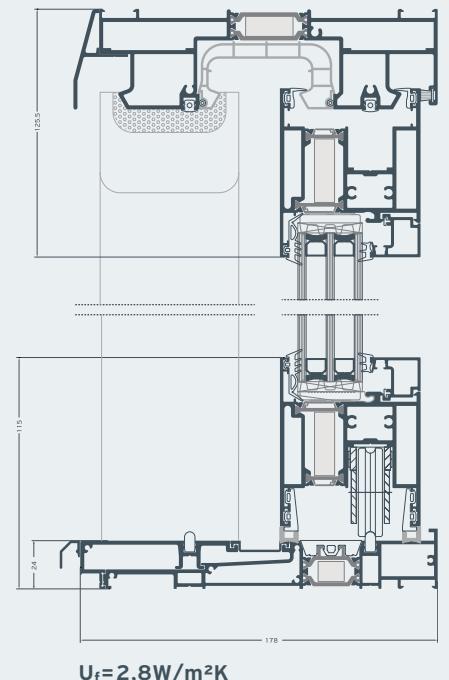

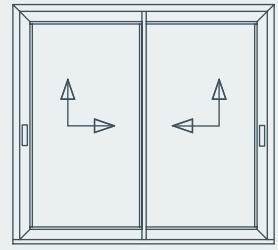

Sistemul este testat de DEKRA, in concordanta cu standardele europene pentru siguranta pentru usile pentru publicul larg.

Componente pentru siguranta aditionala, precum bariere de lumina, perdea de lumina sau senzor radar, sunt disponibile. Sistemul era operat prin telecomanda radio, maner push and go sau manevrare prin cremon.

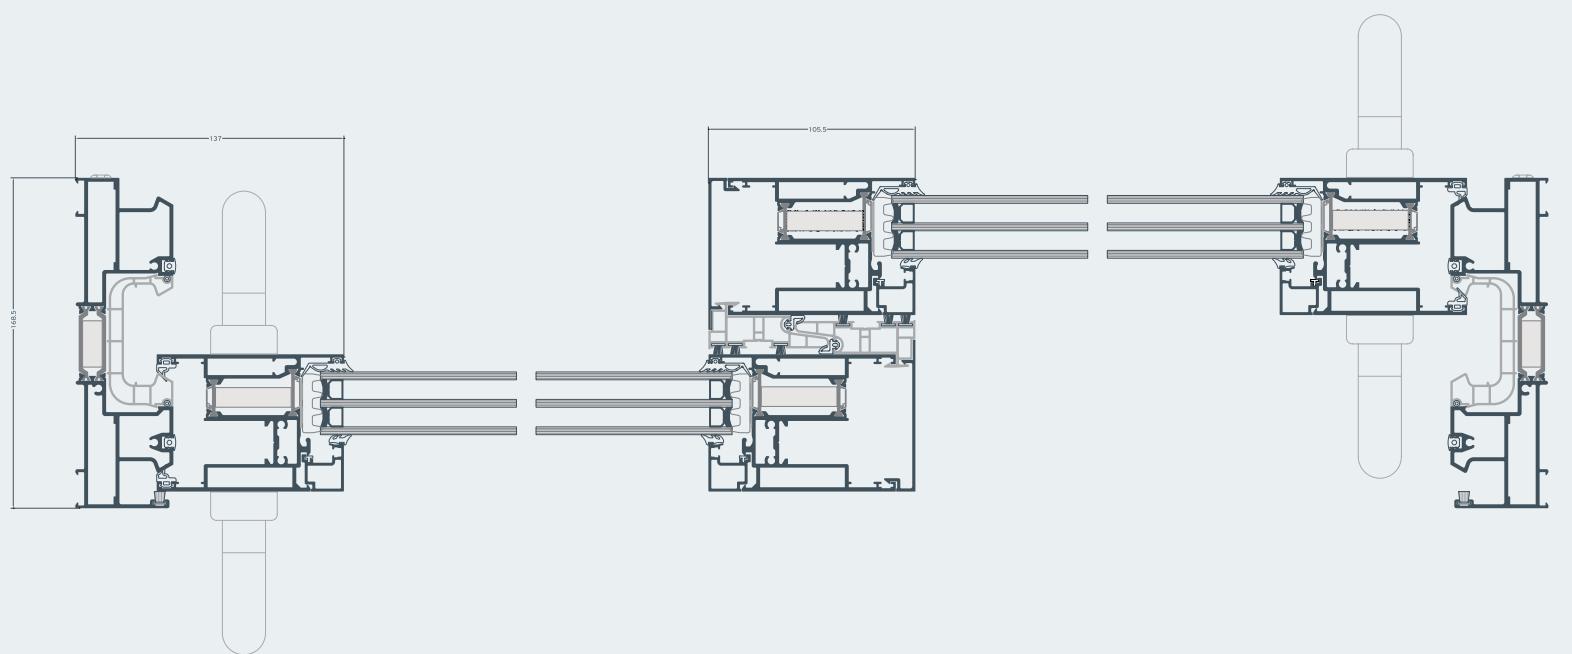

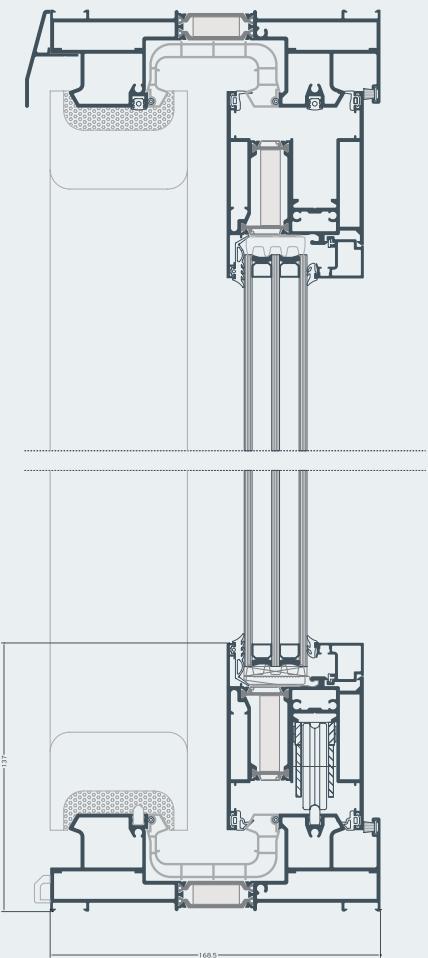

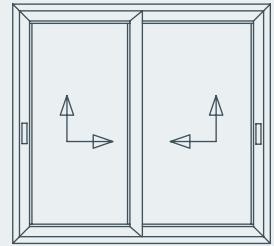

**ALUMIL** > SUPREME  
S700

2 cercevele / 2 cai de rulare  
prag de dimensiuni reduse

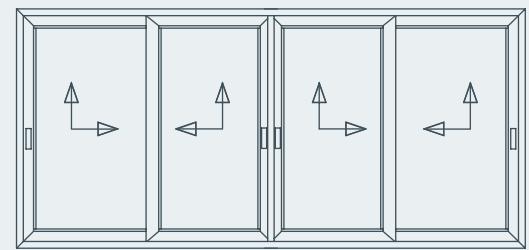

**ALUMIL** > SUPREME  
S700

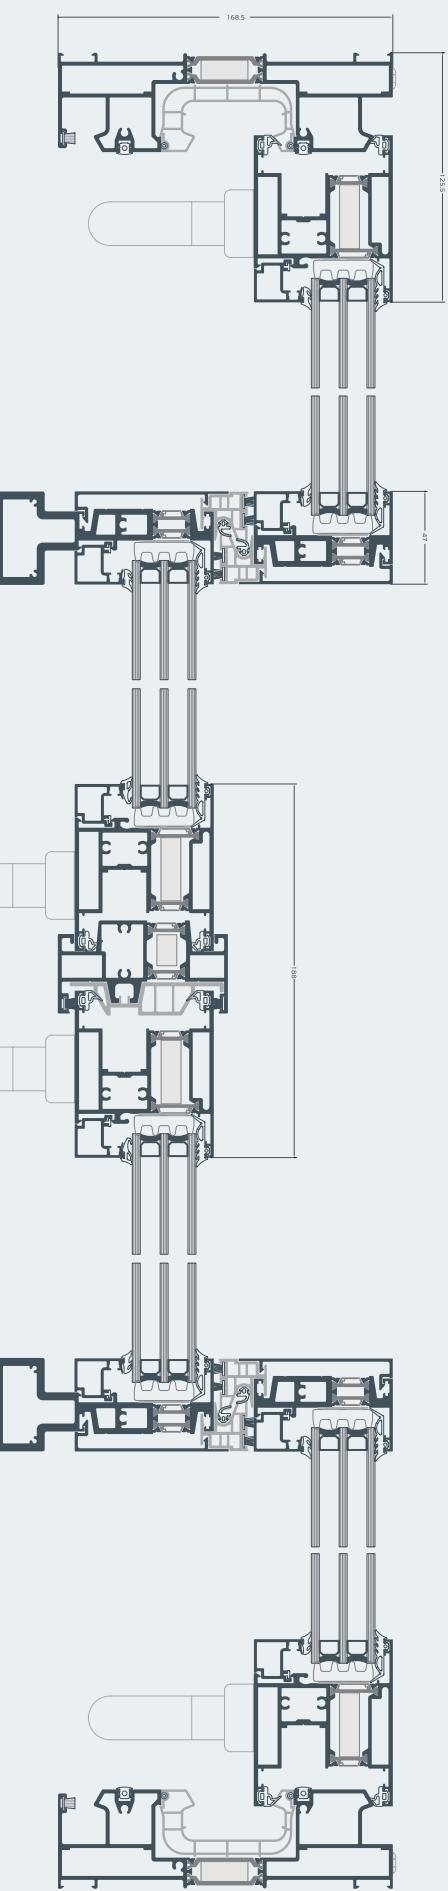

2 cercevele / 2 cai de rulare

4 cercevele / 2 cai de rulare

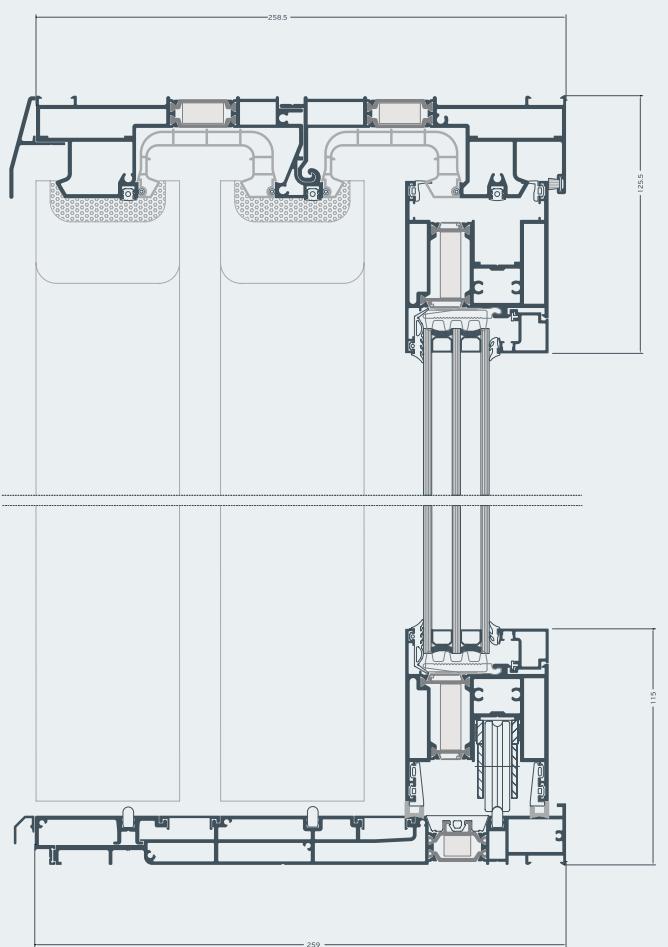

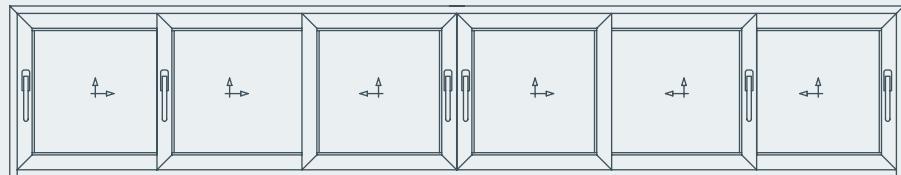

Cooperare excelenta cu sistemul de rulouri ALUMIL, cu bariera termica, SMARTIA S13600, creand o zona izolata termic, ce va imbunatati semnificativ coeficientul de transfer termic (valoarea U) al constructiei.

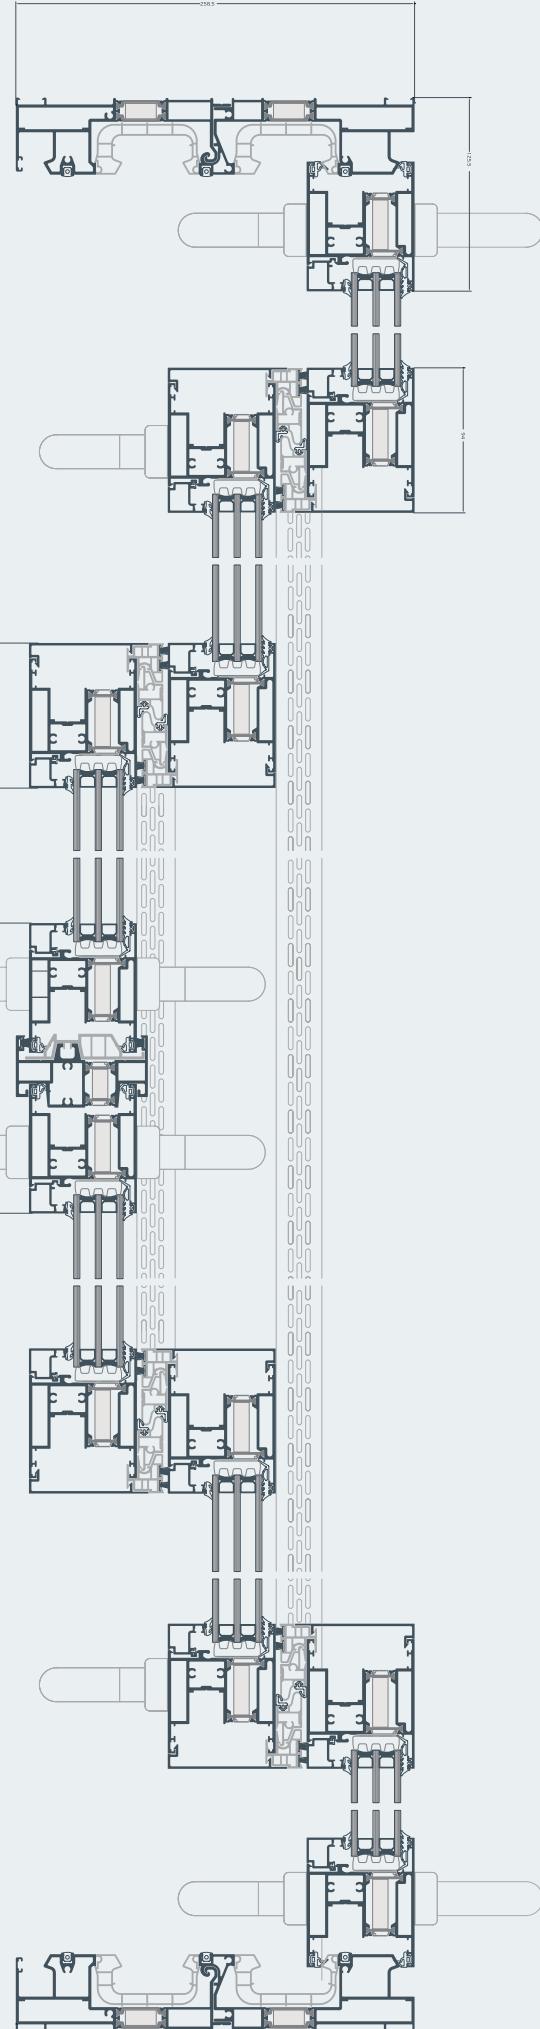

# Alumil > SUPREME S700

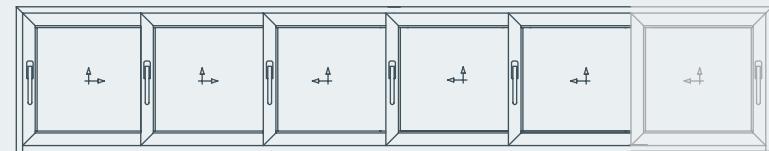

6 cercevele / 3 cai de rulare

Pentru a putea acoperi deschiderile ample, SUPREME S700 ofera doua versiuni diferite a caii de rulare triple (profil de marime redusa si cel standard), pentru aplicatiile tipologilor cu cercevele orizontala liftant-glisanta sau 6 cercevele liftant-glisante cu inchidere cap in cap.

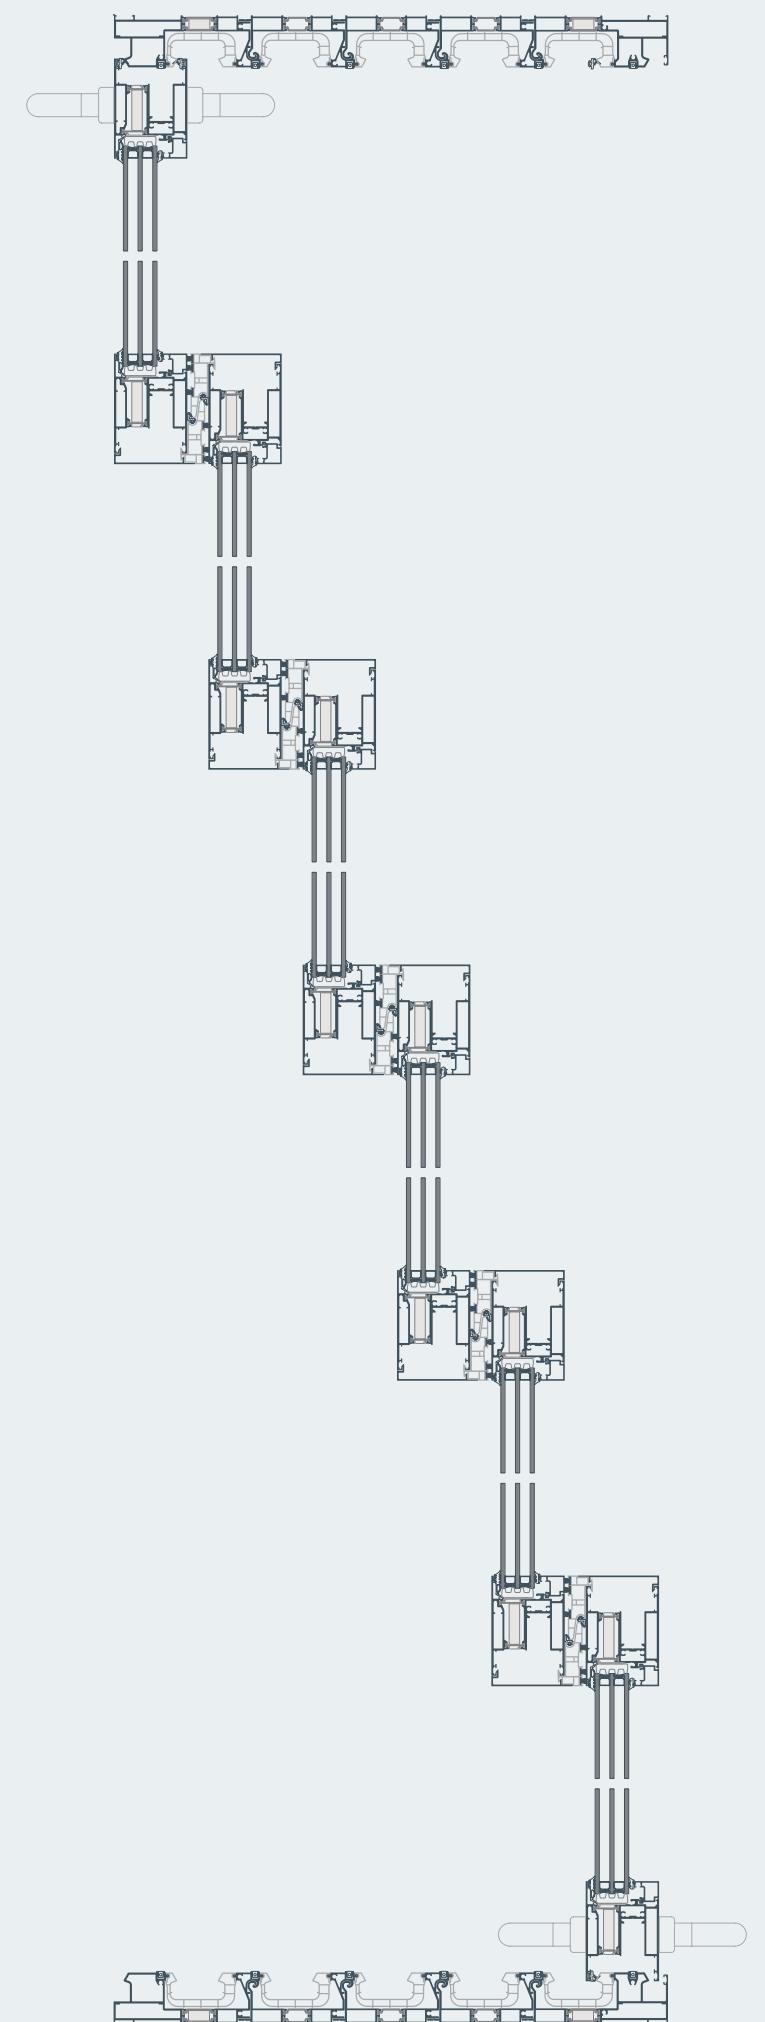

## Canaturi multiple

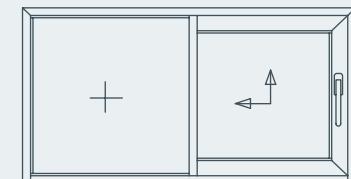

90°

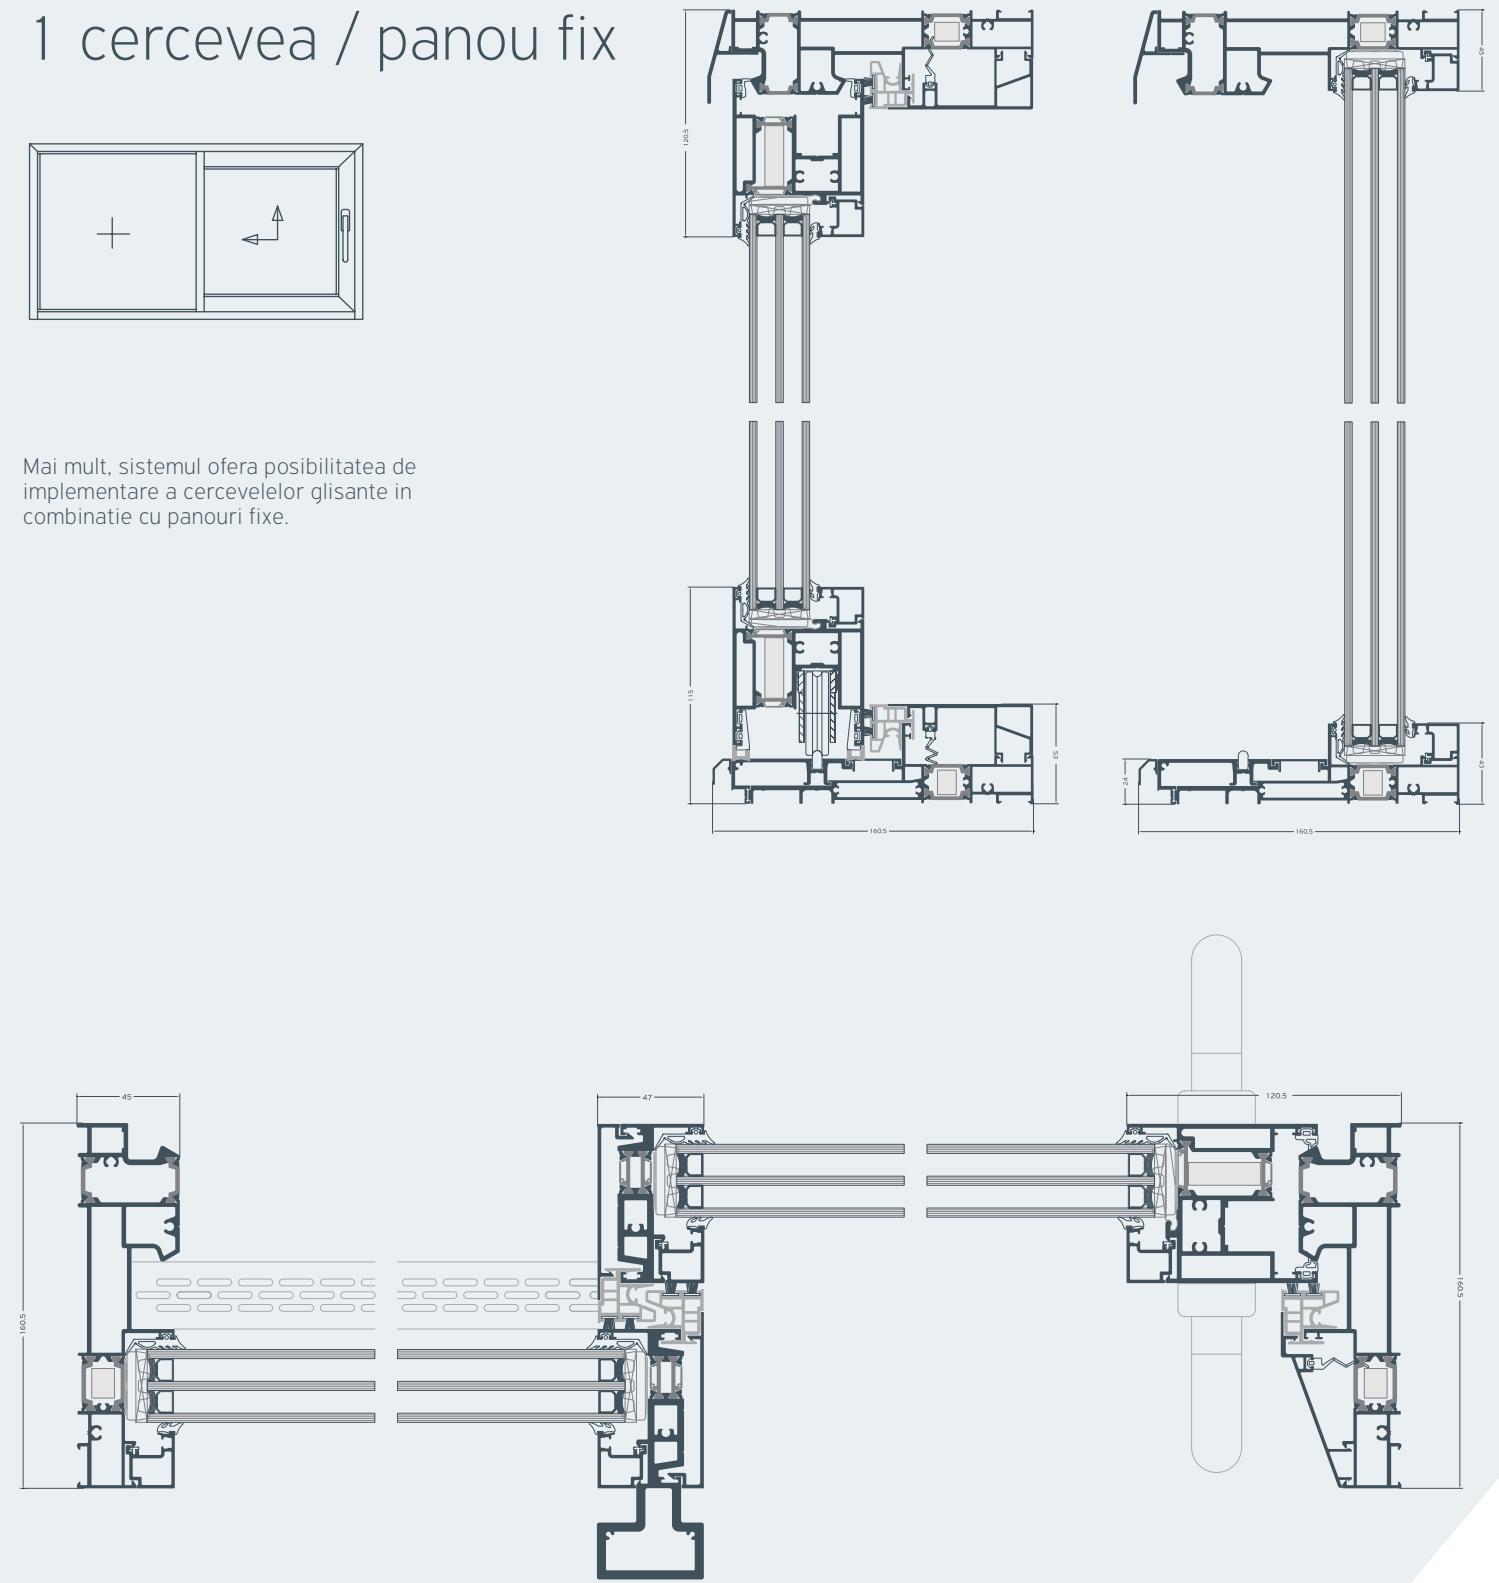

Un numar nelimitat de canaturi glisante orizontale cu profile special concepute pentru realizarea tipologilor cu mai multe canaturi.

## 1 cercevea / panou fix

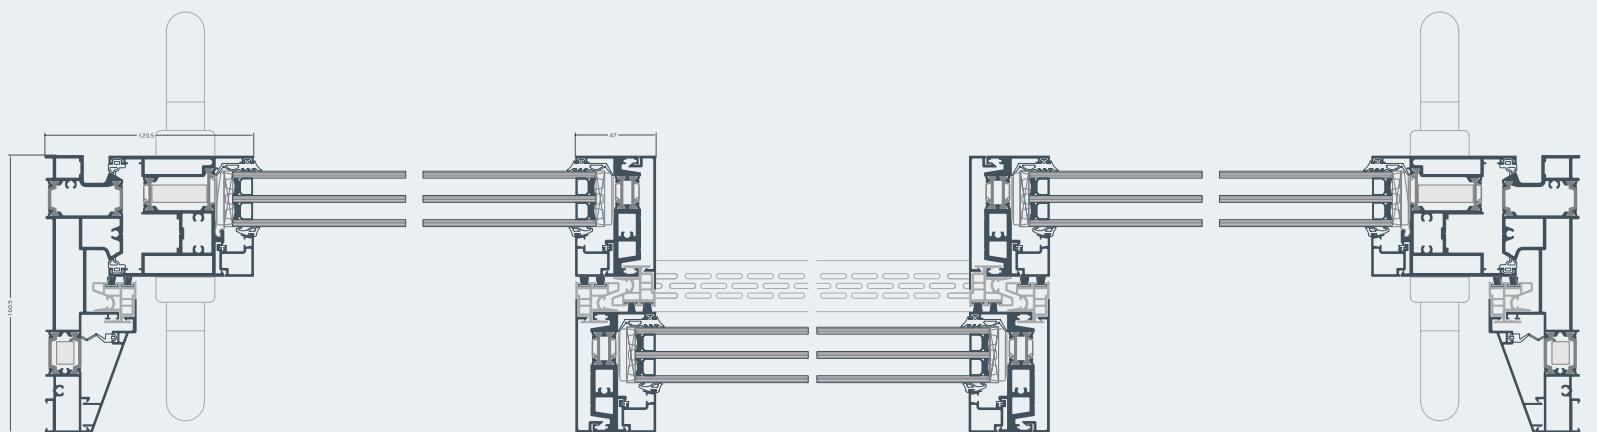

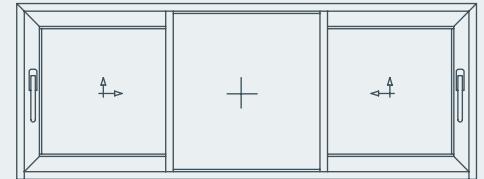

Mai mult, sistemul ofera posibilitatea de implementare a cercevelelor glisante in combinatie cu panouri fixe.

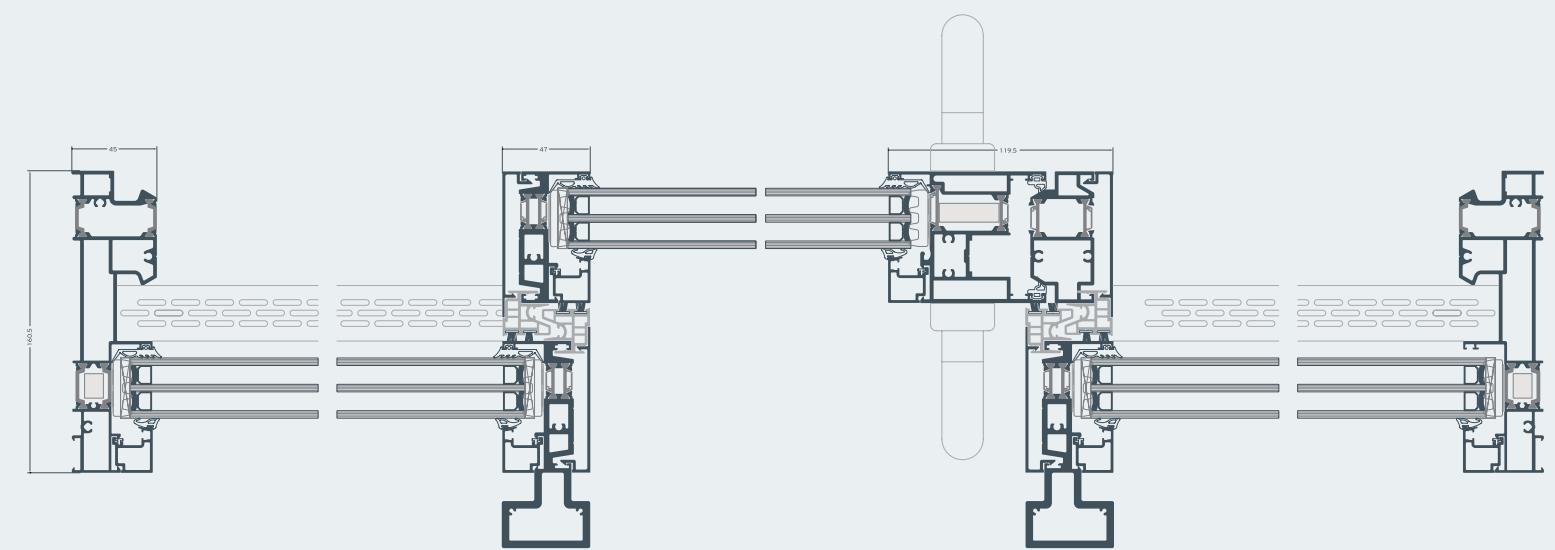

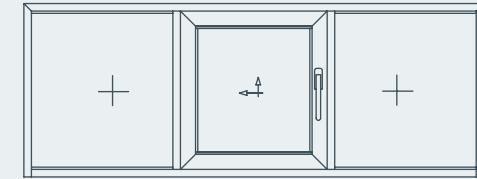

**Alumil > SUPREME**  
S700

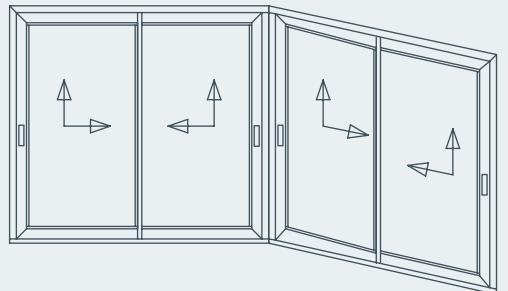

1 cercevea / 1 panou fix / 1 cercevea

1 panou fix / 1 cercevea / 1 panou fix

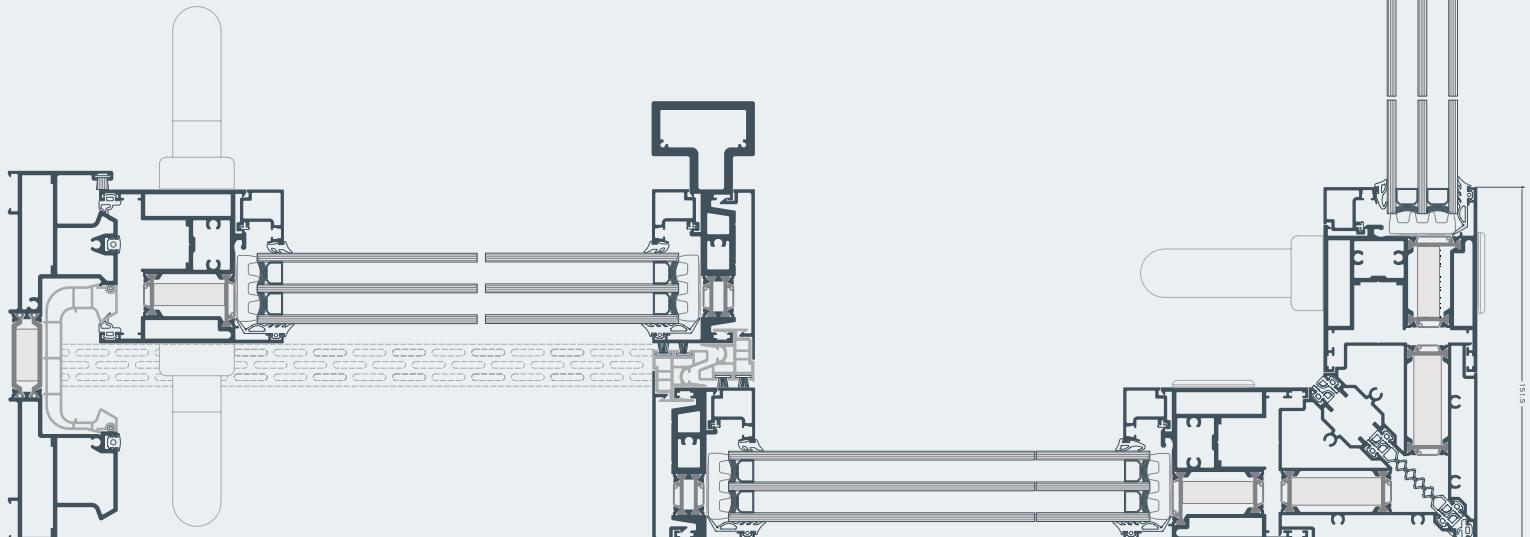

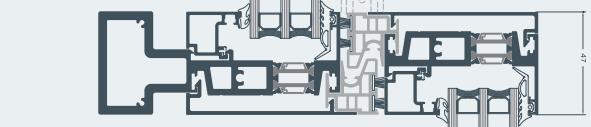

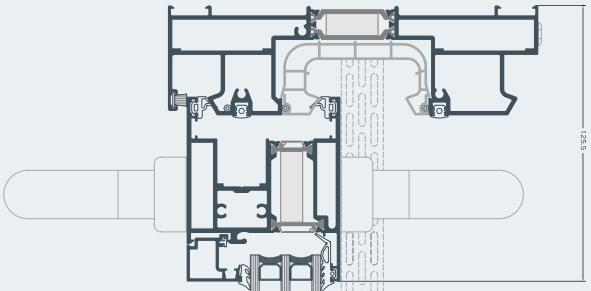

### Coltul exterior

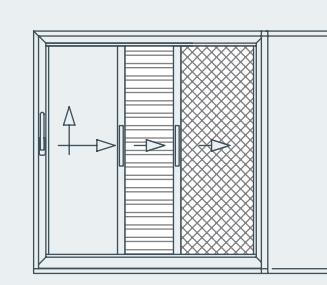

Constructii cu colt liber, fara montanti intermediari:

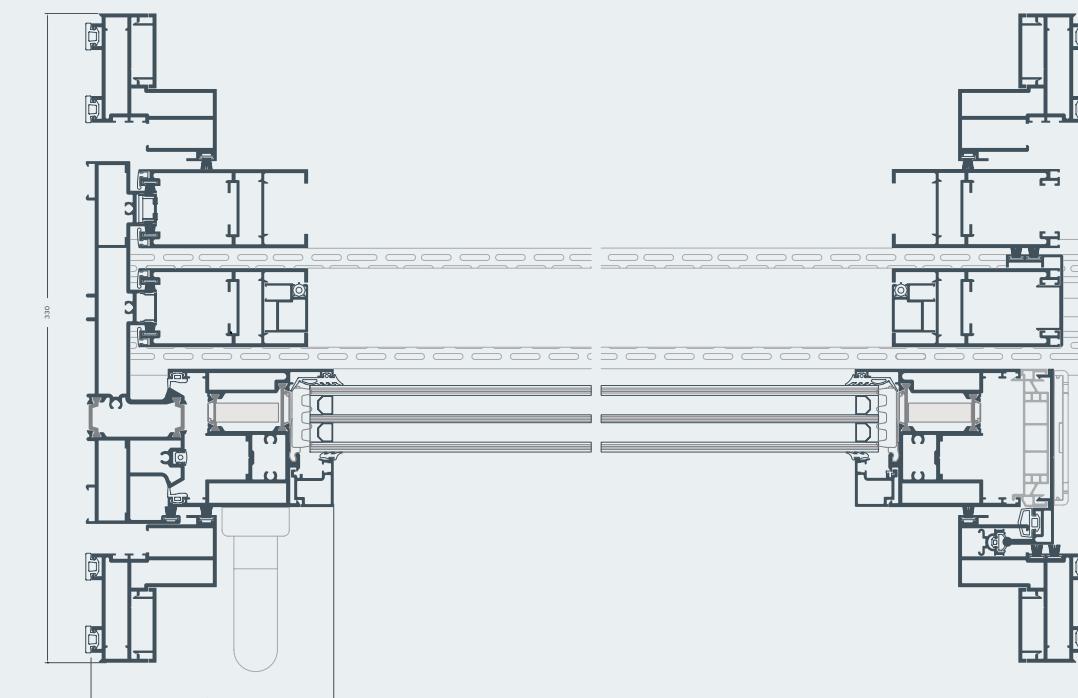

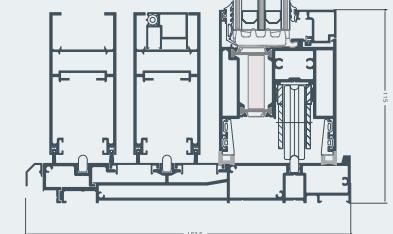

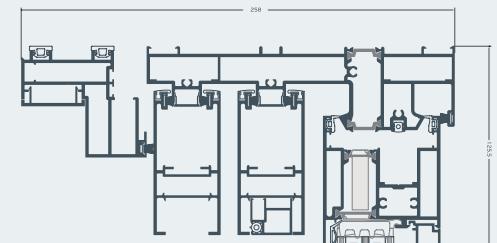

- / Pentru maximizarea volumului de lumina naturala.
- / Pentru un acces facil.
- / Design minimalist.
- / Functionalitate ridicata.

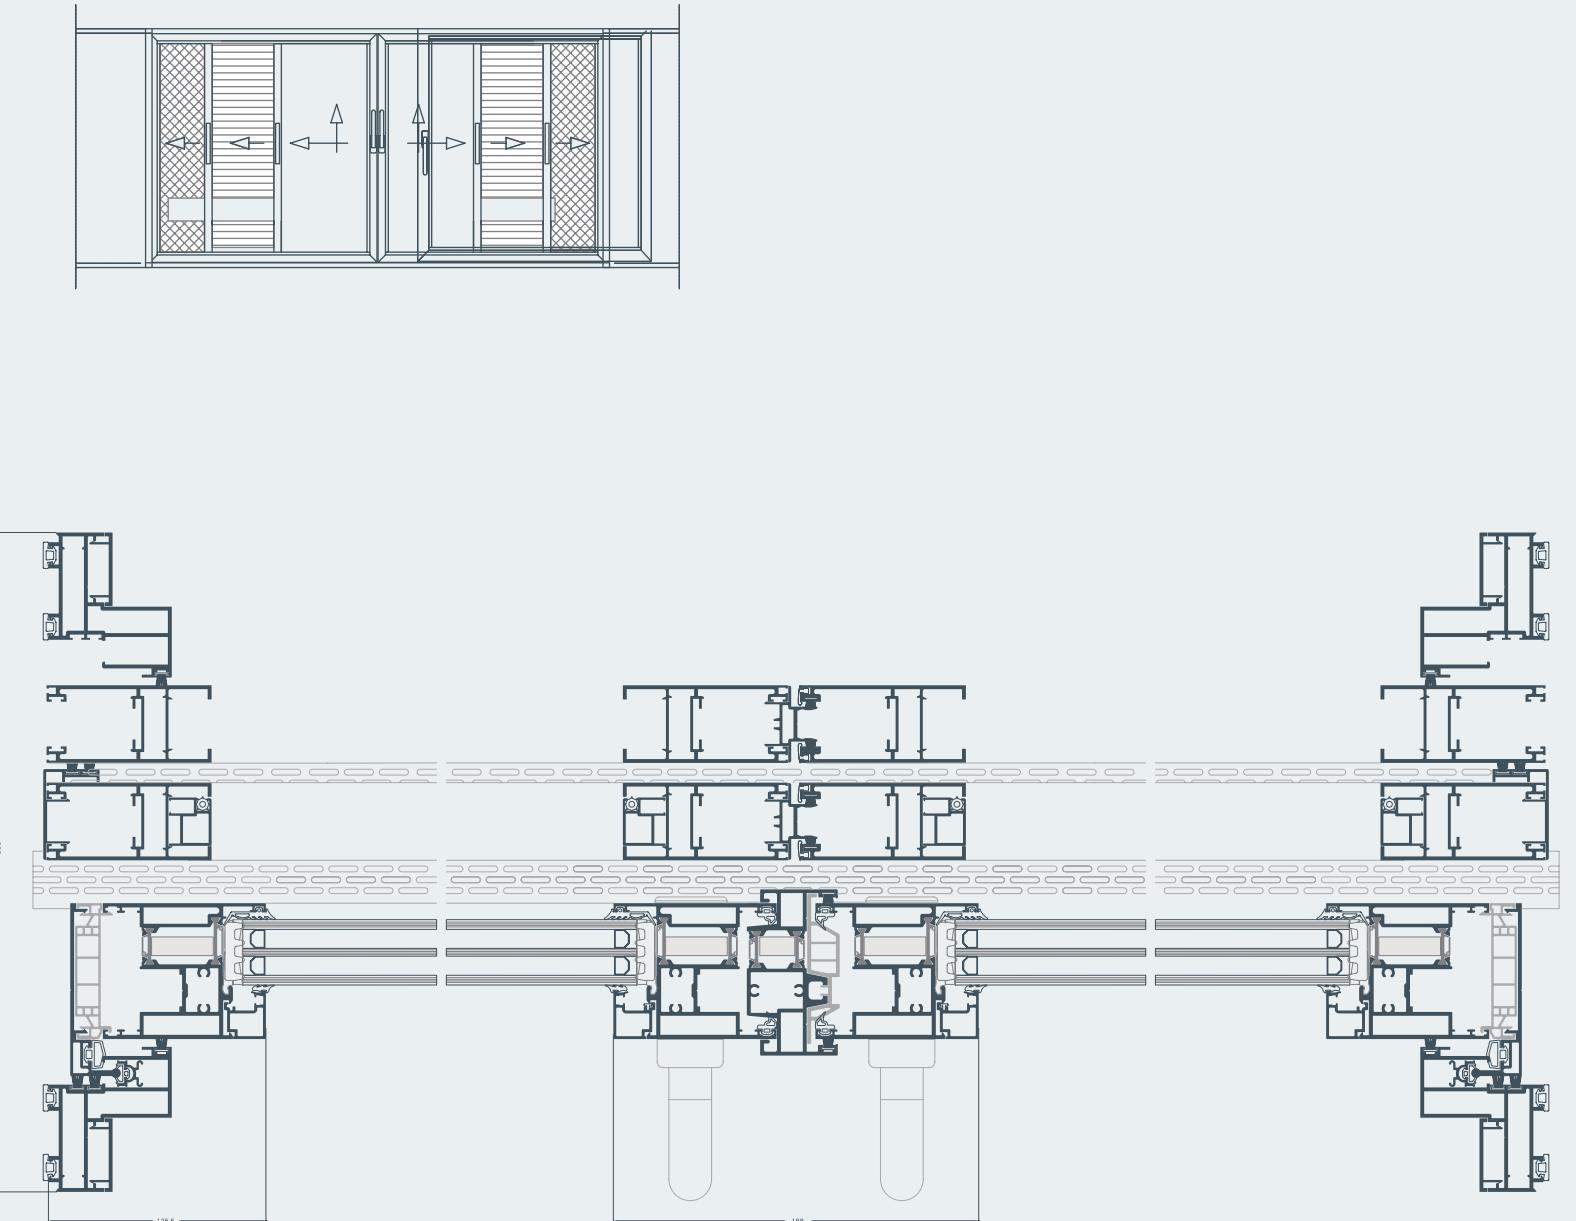

### Canat retractabil cu o cercevea / plasa pentru insecte / oblon

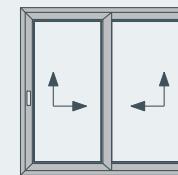

Caii de rulare triple ii poate fi adaugata si o plasa pentru insecte sau un oblon, prin utilizarea unui prag cu dimensiuni reduse, pentru a facilita accesul facil.

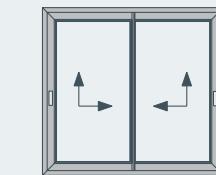

Canat retractabil in perete cu  
2 cercevele / plasa contra insectelor / obloane
